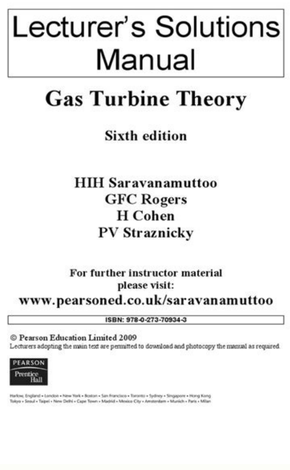
Dual Fuel System

- This gas turbine has duel fuel capability. It supplied with both a natural gas & a liquid fuel (distillate) system.
- While operating on gas fuel, if the gas fuel pressure should drop below a pre-set value, the control system will automatically transfer to liquid fuel operation.
- There is no automatic transfer from liquid to gas, that transfer must be initiated by operator.
- Mechanical fuel handling & electrical control components are incorporated in the design of capable of burning either two fuel individually or both fuels simultaneously.



Lecturer's Solutions Manual

Gas Turbine Theory

Sixth edition

HH Saravanamuttoo
